- -Student workers, inmate workers or patient workers
- -Elected officials

SIC CODE (Standard Industrial Classification Code)
The objective in industry classification is to have each place of business classified on the basis of its principle activity. If a firm conducts different activities at its various establishments, separate industry codes are assigned to the extent possible to each activity. Industry codes are assigned to each reportable establishment based on 'nature-of-business' information employers submit, in accordance with the Standard Industrial Classification Manual, 1972 edition.

ESTABLISHMENT
An establishment is defined as a single physical location at which one, or predominantly one, type of economic activity is carried on. Employers who operate at two or more locations are requested to identify separately the employment and payrolls of each location.

EMPLOYMENT
Employment for a given month is the number of workers covered under the Montana unemployment insurance laws who earned wages from a reporting unit during the pay period which includes the 12th day of the month.

GROSS WAGES
Gross wages, as reported on the quarterly contribution report of employers covered by the unemployment insurance law, are the total amount of compensation paid by the employer during the quarter.

DISCLOSURE RESTRICTIONS
Publication of employment and wage data is withheld for any industry level which consists of fewer than three reporting units or in which a single establishment accounts for 80 percent or more of the industry's employment.

AVERAGE WEEKLY WAGE (AWW) is derived from the total wages of all reported employees of an industry or major group, the average monthly employment for that industry or group during the week of the 12th of each month, and the number of weeks in the quarter.

It is affected by large bonuses, overtime, pay premiums, part-time employment, commissions, etc. These may drastically raise or lower the statewide or county level figure.

It is a statistical figure which can be used with current employment, historical wage and employment data to evaluate and better understand the economic position of an industry or major groups within.

It is not the size of the average employee's paycheck.

FOURTH QUARTER, 1987, IN REVIEW

One third of the employers covered by unemployment insurance are surveyed each year to determine that they are properly classified by:

1. Standard Industrial Classification (SIC), a code that signifies the type of product or service produced by the business;
2. county, with each business assigned a three-digit code according to the county it is located in; and
3. ownership, under which a business can fall into one of four categories - federal government, state government, local government or private. If the business is a government agency, it falls into one of the government classifications. Otherwise, if the business is owned by a private citizen or citizens, it is classified under private ownership.

This year, the industry groups surveyed were Agriculture, Mining, Construction and Manufacturing. Some of these industries experienced major changes because one of more of the three codes were changed. Changes to SIC, county or ownership codes are made if the employer indicated the business has changed or if the original code was in error.

Virtually all industry groups are affected in some way since businesses may be moved into or out of the industry group when changes are made to the classifications of a particular business. The impact of the change is determined by the change in employment and wages in each industry group (SIC), county or ownership.

Changes are made to first quarter data only, but the impact of those changes may be evident throughout the year, especially when data are compared to previous years.

EMPLOYMENT & WAGE COMPARISON GRAPHS

The graphs on the following pages (by major industry group) compare employment and wages for the years 1983, 1984, 1985, 1986, and 1987.

Note that seasonal industries in Montana include agriculture, forestry and fisheries; construction; manufacturing (due to logging); real estate, and services (due to the tourist trade). Also, there is a large drop in government employment during the summer months when public schools are closed.

AGRICULTURE, FORESTRY AND FISHERIES SIC 01 - 09

Employment change from a year ago.....	+ 6.5%
Employment change from the previous quarter.....	-21.8%
Average Weekly Wage change from a year ago.....	+ 9.2%

In the fourth quarter this industry displayed its typical seasonal drop. For the year, with the exception of Forestry (SIC 08), all major groups increased employment. The most notable increases occurred in Agricultural Services (SIC 07) which had an increase of 11.2% or 92 employees. Nearly all of this increase can be found in Veterinary Services (SIC 0740) which had a net gain of five new establishments and Landscape & Horticultural Services (SIC 0780) with a net gain of twenty-eight new establishments over the previous year.

The employment losses in Forestry can be traced to and attributed to Timber Tracts (SIC 0811).

The Average Weekly Wage increased by $23.00 for this industry as compared to the fourth quarter of 1986. Fishing, Hunting and Trapping (SIC 09) led the pay increases with an improvement of $54.00 per week and the smallest increase was registered in Agri-Services (SIC 07) at $19.00 per week.
